

BeneHeart D1

Automated External Defibrillator

Is your work place or community Heart Safe?

- Sudden Cardiac Arrest (SCA) knows no boundaries.
- In Australia approximately 30,000 people sustain cardiac arrest outside hospital and are treated by emergency medical services (EMS) each year.
- An average of only 9% of its victims in Australia survive.
- It can happen anytime, anywhere and to anyone, even young athletes.
- Early defibrillation is the single most effective treatment for SCA.
- Defibrillation within three minutes of collapse can increase the chance of survival to over 70%.

Creating Heart Safe Communities

We are creating safer places for you to work, live and play.

- Mindray and its Distributors aim to create more Heart Safe Environments across Australia by placing defibrillators in educational establishments, workplaces, sports and leisure clubs, public and community environments—allowing you to simply, safely and effectively help someone save a life.
